Skills

- ✓ Java
- ✓ Spring Framework
- ✓ RESTful APIs
- ✓ Maven
- ✓ Micro-services
- ✓ JUnit
- ✓ JPA
- ✓ Hibernate
- ✓ Android
- ✓ PostgreSQL
- ✓ Mysql
- ✓ MinIO
- ✓ ELK (Elasticsearch Logstash Kibana)
- ✓ Kafka
- ✓ Redis
- ✓ Tomcat
- ✓ Wildfly
- ✓ Jenkins
- ✓ Docker
- ✓ Kubernetes
- ✓ Git

WORK HISTORY

Software Engineer

Integrated Software and Technologies Ltd
August/2017- Current

Projects:

1. **CDMS** a database management system for a defense organization, I worked mainly in back-end REST API services. Integrated an AFIS for bio-metric matching which uses fingerprints, photo and iris.
2. **OIVS** is another project for the same organization. I worked as a back-end developer. There was an android application for this project. Where sdk integration required for mobile devices such as Crossmatch, Dermalog so that those device can capture fingerprints and able to search for internal and NID match. Web portal, device location tracking and report generation those are some features.
3. **EGATE** is a immigration project where we build a middle ware to verify users. I implemented ELK(Elasticsearch Logstash Kibana) for log store and analysis.
4. **RCMS** is Returnee Case Management System for immigrants where i worked as a back-end developer.
5. **PDMS** is a Prisoner Database Management System build with java-fx where i worked as a support/back-end developer.
6. **SESP**(Secondary Education Stipend Programme) is a project for distributing stipend among eligible students worked as back-end and front-end integration.

Jr Software Engineer

Wariftech

November/2016 – August/2017

Projects:

1. **Smart School** Android application, maintaining school students data like entry and leave time, routine update, tracking different school bus locations and share to there parents, results update etc.
2. **Leave Management** web application for a battalion. Scanning RF Id card count there leave days, entry and leave days and history of a individual.

EDUCATION

- **Bachelor of Science**
Computer Science Engineering, 2015
